

Geotechnical Engineer – Make an Impact with LDG!

Are you a Professional Engineer (PE) with a rock-solid geotechnical background looking to work on exciting, high-impact projects? Do you thrive in a collaborative environment, solving complex challenges alongside talented professionals? If so, Larson Design Group (LDG), a 100% Employee-Owned Firm, wants to hear from you!

Why LDG? Because You'll Get to:

- ✓ Drive Geotechnical Excellence – Contribute to the planning, design, and execution of cutting-edge geotechnical solutions that shape the built environment.
- ✓ Engage in Meaningful Projects – Work closely with multidisciplinary teams to develop geotechnical strategies tailored to client needs.
- ✓ Master the Technical Side – Perform in-depth stability, settlement, foundation capacity (pile/drilled shafts), and slope analysis.
- ✓ Collaborative Success – Work across departments to integrate geotechnical solutions into broader engineering designs.
- ✓ Expand Your Expertise – Gain exposure to a variety of projects while exchanging knowledge and best practices with colleagues.

This is more than just a job, it's an opportunity to problem-solve, grow, and contribute to impactful geotechnical projects. If you're excited to work in a dynamic, employee-owned firm, apply today!
